Why now? FSMA Good Manufacturing Practice regulations became effective 9/18/2017 for firms having over 2.5 Million Dollars of Animal Food Sales.

Animal Food Preventive Controls Qualified Individuals (PCQI) training: This is the standardized curriculum recognized by the US Food and Drug Administration for training individuals to be qualified to oversee the safe manufacture of animal food (PCQI). Normal price is \$850 per student which includes your FSPCA certificate fee, and all downloads. Learn how to write and update an animal food safety plan. The course is a prerequisite for inspectors conducting FDA CGMP inspections.

The typical course runs 2.5 days in the face-to-face format. That's a long time on a headset. We're going to break it up over 4 days so you can keep up on your day job. Upon completion participants will receive a certificate from the Food Safety Preventative Controls Alliance signed by AAFCO. This is the same certificate as the face to face class. You must be present the entire 20 hours to receive a certificate.

About us: Our company was formed in 2016 to deliver the training needed to implement FSMA and build a food safety culture in the feed industry. Our instructors deliver the courses monthly and have the experience to answer your questions.

Class will be delivered online over 4 days.

We will be using Adobe Connect for the classroom. Here is a link to their quick start guide. A web camera will enhance your classroom experience.
