

Product Specification Sheet

Specifications:

Vendor Parts Number: SE8369

Construction:

The Negative Weight Bar is TIG welded and made of durable, powder coated high strength steel. The bolsters are made of heavy density vinyl covered foam. Standard vinyl covers are black, dove gray and imperial blue. Other colors are available upon request.

Assembly: None required.

Product Dimensions:

SE8369: 24"x 24"x 24", 6.0 lbs.

Shipping Dimensions:

SE8369: 25"x 25"x 25", 7.0 lbs.

The Negative Weight Bar ships FedEx or UPS.

Warranty:

1-year bumper to bumper on all parts.

3-years on vinyl covered foam bolsters.

Life time on frame.

Functions:

The Negative Weight Bar assists clients with closed chain exercises of the lower extremities when full weight bearing is restricted or functionally impossible. The bar assists with weight shift, squatting, step ups and step down. It is light, and it fits most body sizes due to the change in angle (wide to narrow) where the bolsters are located. Custom size is available upon request.
