

Islands of Genius PBL Areas of Knowledge

Although numerous instances of prodigy and Savant Syndrome cases manifest themselves in **Musical** or **Mathematical** abilities, others appear as genius in **Art Studies** such as painting or drawing, or even within the disciplines of **Engineering** or **Social Sciences - Economics**. Other instances will involve additional areas of knowledge, depending on the individuals whom the students choose to research/study.

Furthermore:

- 1) **Film Making** is applicable if the students create a film or documentary about their findings.
- 2) **Technical Writing** may be involved in describing the anatomical/psychological reasons for genius.
- 3) **Creative Writing/Composition** may be used in students' descriptions of the emotional and relationship implications.

Consider these Areas of Knowledge and Understanding, and more, as you embark on your Islands of Genius PBL.
