**Do YOU consider this something that a good breeder would allow?**

Type: ROUTINE INSPECTION  
Date: May-28-2014

**3.11 (a) CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.**

(a) Cleaning of primary enclosures:

\* Three enclosures (containing three dogs) have a significant build-up of fecal material. The dogs were seen to be walking in/through the feces. This type of build-up can increase soiling of the dogs, pests, odors and disease hazards. Licensee must ensure that feces and other waste are removed from the enclosure on a daily basis to help prevent or reduce soiling of the dogs, odors, pest and disease hazards.

\*\* To be corrected by: 5/29/14

Inspection and exit interview conducted with facility representative.
