

Graph is based on 255 pre-post surveys.

372 total children were assigned Listeners this year. 287 students met with their Listener 10 or more times. Teachers for 255 students (88.9%) completed pre-post surveys. There were various reasons for having fewer than 10 meetings: relocation of family, students who joined the program later in the school year, Listeners' personal issues (health, jobs, family), etc.
