

Empowering the whole Family!

Our 2019 Family camp will specialize in serving visually impaired children between the ages of five and twelve and a parent, guardian, or a close relative. Our goal is to enrich the whole family with opportunities to improve their social environments and gain important educational resources in a recreational environment.

The children will also develop personal physical achievements, and participate in activities suitable for their age group. The children will be exposed to unique camp events, such as: swimming, horseback riding, a climbing wall, fishing in the pond, and age appropriate craft activities. All the while, there will be well trained supportive counselors involved at every step.

While campers are having fun, the family members or care providers will have the opportunity to attend special breakout sessions to give them a chance to ask important questions and learn a variety of adaptive devices and techniques available to their child. They can also address issues that are associated with providing nurture for a blind child and gain valuable knowledge of needed resources in which they can take home.
