

SunRunr Product Catalog 2017

... Generating Opportunity ... Storing Resilience ... Empowering Security

SunRunr Portable Solar Systems - output ("model") chosen upon order		MSRP
	<ul style="list-style-type: none"> - "Flagship": 110/120 VAC, 60Hz - "Well Pump" for devices at 240 VAC, 60 Hz - "International" for 220/240 VAC, 50 Hz <p>Systems store 2kWh of renewable power. The included pair of hinged, pre-wired 150W solar panels generates an additional 1.5kWh daily. Inverter rated at 5kW continuous/10kW surge. Powder-coated steel chassis, easy-roll casters, rugged handles, 28"x15", 30", 260lbs.</p>	\$5300.
Options, Accessories, Upgrades - for customizing or increasing "size"		
	<p>Recommended Option: Add an additional pair of solar panels through the pre-wired AUX portal. Allows for an additional 1.5kWh daily and quicker recovery.</p>	\$1300.
	<p>Expand systems with linkable, quick-connect SunPowr Power Modules. A SunPowr shares the SunRunr's inverter while adding generation and storage.</p>	\$4100.
	<p>Custom Cable Length Standard pre-wired cable length is 30', but may be customized at order. Typical lengths: 50', 100', 150'</p> <p>Panel Frame Each holds two hinged panels.</p>	<p>\$60, \$420, \$800</p> <p>\$350.</p>
	<p>Full Sine Inverter Upgrade (Recommended) Upgrade to a 3500/6000W pure sine wave inverter to run sensitive electronic devices (e.g. some pellet stoves, desktops, older audio).</p>	\$1000.
	<p>AC-DC Charger A SunRunr's battery may be charged from the grid by our AC-DC charger pre-wired with AUX plug.</p> <p style="text-align: right;">\$150.</p>	 <p>AUX Plug with starter cable (12VDC in/out) Plug with 2' of wired cable allows for easy integration of other 30A-max renewable energy charging sources such as wind or micro-hydro turbine. May also be used for drawing 12VDC directly from the battery.</p> <p style="text-align: right;">\$40.</p>

Discounts available for public and private sector quantity orders. Systems qualify for most state and Federal tax credits.
