More

So you've heard about Esri's Collector App and think it might work for your data collection needs? Electronic Data Solutions can help you get up and running quickly. No matter your application or the size of your project, we offer scalable services to meet your needs. All services include one year of Elecddata Support Now, a \$250 value.

### Discovery Services

Elecddata's support and sales staff can provide this consulting service prior to any implementation to help your organization make the right technical decisions to reduce costs and increase productivity. We can review your current hardware, software, workflows, goals and requirements to discuss how you can benefit from using Collector for field work. Contact Elecddata for a quote for this customized service or to discuss one of the following options.

### Intro Services

These services include our Intro to Esri Collector App services starting at \$695.

Options include but are not limited to:

- Online assistance setting up simple Collector project
- Web map creation and design for use in Collector
- Brief Collector training

### Data Services

These more in-depth services include assistance in incorporating your data into ArcGIS Online and Collector, starting at \$1995. Services may include Intro services in addition to the following:

- Consultation and assistance optimizing data structure and symbology for use in ArcGIS Online and Collector
- Training on creating feature services hosted in ArcGIS Online for use in Collector
- Proper configuration of feature services and web maps to allow for editing, working offline, preventing deleted data, etc.

### Server Level Services

If you are looking for the complete package from server to the cloud to Collector and back again, contact Elecddata about our Server Level Services. We can assist with the following:

- Database design and creation for optimal data collection in Collector, including subtypes, defaults, attachments, etc.
- Import of existing geodatabase into SDE for use in ArcGIS Online and Collector
- Creation and configuration of feature services from your SDE to allow for auto-population of certain fields, offline editing, data protection, etc.
- Creation and configuration of Amazon server running your ArcGIS for Server software
- Instruction in creating and editing web maps using services hosted on your own server for use in Collector
- Customized training and documentation for your organization based on your specific setup and use
