

Rabbit Anti-MSH6 [MD179R]: RM0131, RM0131RTU7

Intended Use: For Research Use Only

Description: The MutS homologue 6 protein (MSH6) is a member of the MutS homolog family required in the DNA mismatch repair system. Carriers of the mismatch repair gene mutations have a high lifetime risk of developing Hereditary Non-Polyposis Colon Cancer (HNPCC) and several other cancers including endometrial cancer due to microsatellite instability (MSI) caused by accumulation of DNA replication errors in proliferating cells. MSH6 antibody is useful for screening and diagnosis of patients with MSI. The level of MSI has been reported to be associated with prognosis in colon cancer.

Specifications

Clone: MD179R
Source: Rabbit
Isotype: IgG
Reactivity: Human
Immunogen: Recombinant fragment aa 1-100 of human MSH6 protein
Localization: Nucleus
Formulation: Purified antibody in PBS pH7.4, containing BSA and $\leq 0.09\%$ sodium azide (NaN₃)
Storage: Store at 2°- 8°C
Applications: IHC, ELISA, WB
Package:

Description	Catalog No.	Size
MSH6 Concentrated	RM0131	1 ml
MSH6 Prediluted	RM0131RTU7	7 ml

IHC Procedure*

Positive Control Tissue: Colon, breast cancer
Concentrated Dilution: 50-200
Pretreatment: Tris EDTA pH9.0, 15 minutes using Pressure Cooker, or 30-60 minutes using water bath at 95°-99°C
Incubation Time and Temp: 30-60 minutes @ RT
Detection: Refer to the detection system manual

* Result should be confirmed by an established diagnostic procedure.

FFPE human colon stained with anti-MSH6 using DAB
