

Technical Data Sheet

Solvent Plus

PRODUCT DESCRIPTION

Solvent Plus is an oil soluble blend of paraffin inhibitors, dispersants, penetrants and wetting agents. This technology enhances the performance of heated fluid in the removal and transportability of waxes and asphaltenes.

BENEFITS & APPLICATIONS

- Suspends and keeps waxes in solution
- Advances Coil-Tubing clean out fluids
- Ease of mixing and application with pumping equipment
- Utilized in heated solvent applications
- Economical thermal fluids

TREATMENT RECOMMENDATION

Solvent Plus is a ready-to-pump liquid blend mixed at 1-3 % solution that can be mixed with high flash point aromatics, methyl esters, diesel and kerosene. The concentration range is dependent on the severity and composition of the deposit being remediated.

TYPICAL PHYSICAL PROPERTIES

Appearance.....Clear, Yellow Oily Liquid
Specific Gravity.....0.775-0.840
Flash Point.....100 ° F
Auto-Ignition.....410 ° F
Solubility in Water.....None
Solubility in Oil.....Soluble

PACKAGING

Solvent Plus is supplied in 5-gallon (19-liter) pails and 55-gallon (208-liter) drums. Also available in transportable tote tanks or larger bulk carrying capacities.
