# WwB ... A GOOD PLANT RECOMMENDATION?

## Rose 'Pink Cadillac'

Imagine, for a moment, that there was such a thing as *Raphiolepis*, except that it had 3-4" pink flowers, instead of tiny little ones. And if we could really dream, imagine that it bloomed year-round, instead of just a brief period in the Spring. Same evergreen foliage, same durability and care. STOP DREAMING... IT'S HERE! 'Pink Cadillac' Rose is all that, and more! Hardy to well below zero, but can take inland valley heat. No leaf diseases, and great from ocean's edge to all states and climates in the nation. Semi-dwarf in habit. Our very own hybrid, and on its own roots (so it never emerges from below a graft).
