*"We've also hosted the Harlem Wizards, which is a farm team of the Harlem Globetrotters and we had an event here where they played a faculty and parent team to open our new gym. Judging by the way they dunked the ball, the flooring system works magnificent. We've also been able to host our graduation in here. So in other words, we were able to insure that the flooring can provide sports, but also any other events that a school might want to use in a gymnasium..."*

# INSTALLATION METHODS

OMNISPORTS™ IS A VERSATILE SPORTS SURFACE THAT GOES BEYOND THE NUMBER OF SPORTS AND EVENTS IT CAN HOST.

Before the first game can be played, a new Omnisports floor needs to be installed according to the conditions on site to ensure maximum performance and durability. A variety of installation methods are available to accommodate each facility’s particular circumstances, backed by a 15-year warranty for moisture tolerance based on each installation recommendation. Always consult a Tarkett Sports representative in choosing the right installation method for your project.

## TARKOLAY

Every flooring installation is different. In some cases, high moisture, cracks, joints or other factors present challenges that require an underlayment. Tarkolay is a FloorScore-certified underlayment that isolates the flooring system away from the substrate, removing the potential for vapor pressure to form. Tarkolay also assists with installations over moving joints, minor cracks in concrete substrates, and over existing surfaces that are adverse to standard installation methods. Only Multi-Poxy adhesive may be used with Tarkolay.

### 1. ISOLATION OF THE SPORTS SURFACE

Tarkolay mitigates adverse conditions by separating the sports surface from the subfloor. Through isolation, an imperfect subfloor is less likely to affect the integrity of the surface installation.

### 2. DIMENSIONALLY STABLE UNDERLAYMENT

Tarkolay is a dimensionally stable underlayment with a smooth top surface for excellent adhesion to the sports floor.

### 3. RAISED TEXTURE FOR DISPERSING WATER VAPOR

The embossed texture on the bottom of Tarkolay allows water vapor from the subfloor to dissipate without building pressure that would harm the integrity of the installation.

## GREENLAY

GreenLay has revolutionized sports flooring installations as the new standard of performance and environmental responsibility. In an 8,000-square-foot gymnasium, less than one gallon of adhesive is used compared to nearly 64 gallons for a full-spread installation.

### HOW IT WORKS

GreenLay uses small amounts of adhesive along the parallel walls of the court, in doorways and around volleyball sleeves, while Tarkotape from Tarkett secures each seam for welding. The Omnisports material does the rest with its excellent dimensional stability and virtually tension-free manufacturing process to make it the only resilient sports flooring that can be installed this way. In short, the superior quality of Omnisports makes GreenLay possible.
