

THE LAST JEWISH GENERATION

The purpose of this illustration is to investigate when the 2nd Temple (Herod's) was 'officially' completed. Research confirms that there were exactly 7 years from when the Temple was completed to when the destruction of the Temple by the Romans took place. The year was 70 AD. Thus if 7 years is subtract from 70 AD, the year will be 63 AD for a total of 70 years. This timeline only suggests that a 63-7-70 Year Pattern could be repeating in the current generation - to be witnessed as being perhaps the Last Generation spoken by Christ Jesus. If one takes 1948 when Israel was restored as a nation, it gives us the possible prophetic benchmark as to when the start of this 'Repeating' of the pattern might have already occurred. This pattern will be superimposed with the 63, 7 and 70 year numerical factors. The pattern thus leads up to the years 2011 and 2018 as it was 'mirrored' leading up to 70 AD. If this is valid, then 2018 is yet to turn out to be a key date marker year for Israel. Perhaps it will be the 'Last Generation' that is to enter the prophetic events as Jesus Christ described. Perhaps this time period might have a corresponding relationship, as it did with the Desolation of the of the 2nd Temple in 70 AD for the Jewish Nation.

ASSOCIATED WITH THE TEMPLE AND TIME OF JACOB'S TROUBLES

SOME OBSERVATIONS

Both 'Bull's Eye' Blood Moons will be in line the city of Jerusalem and in-between the 2 horns of the constellation Taurus-7 years apart. The Sun is in the Sign of Taurus during the season of Pentecost as it was in Mt. Sinai and 50 days after the Resurrection of Jesus Christ. There is a strong connection between the 2 Blood Moons of 2011 of 2018 with Pentecost Feast Harvest of wheat that occurs every Spring. The Central Blood Moons of 2011 and 2018 make this timespan a possible precursor or template of the possible start of the 7-year Tribulation Period.

A 7-Year Pattern

The timeline-chart above illustrates the Bull's Eye Blood Moon 7-year interval and its possible prophetic significance. The start of the 7-year interval begins on the Jewish feast of Pentecost, in June of 2011. Both Central Blood Moons of 2011 and 2018 occur on a Pentecost, based on alternative calendar counts. This season could thus be a pivotal point of reference in considering its possible prophetic significance in the timing and meaning as it relates to a the possible conclusion of the Church Age. Perhaps leading up to 2018-19, the Rapture and the start of the 7-year Tribulation Period would have commenced at some point in time thereafter; it is that close by this estimation. The 2nd timeline illustrates the 7-year Interval of the 2 Bull's Eye Blood Moons that rarely occur, much less being exactly 7-year apart and in the same constellation and in line with the same city, Jerusalem.

CENTRAL BLOOD MOONS

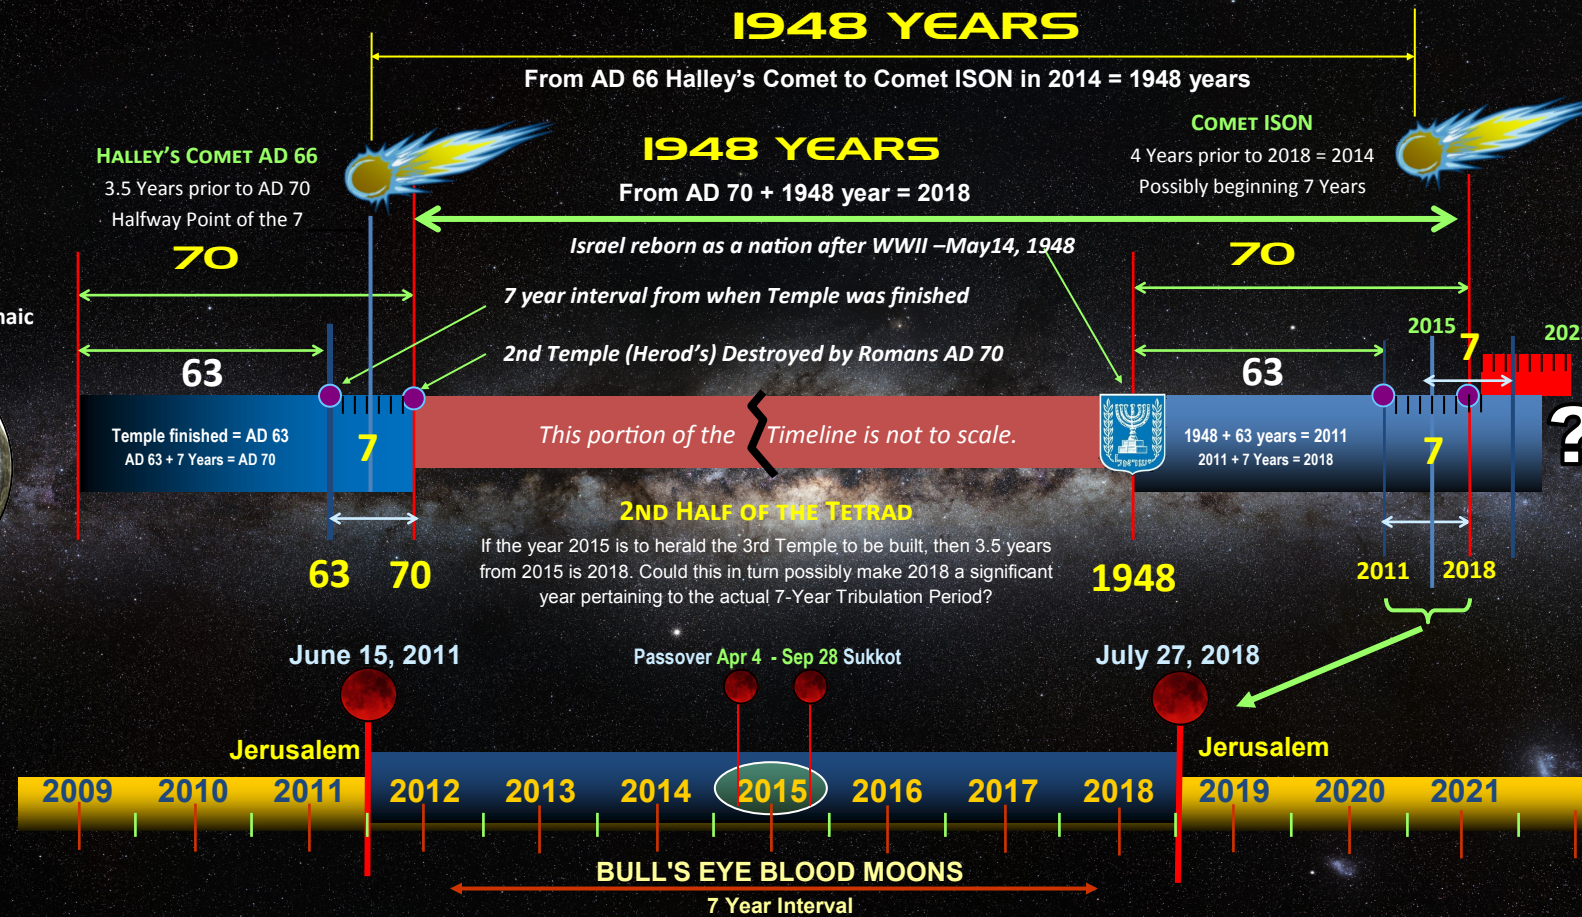

7 Year Interval of the Bull's Eye Eclipses

Is this a Time-Marker heralding how long the duration of the TRIBULATION PERIOD is to be and perhaps when it is to come?

The restorations or extensions of the Second Temple of Zerubbabel's work begun by King Herod I the Great (73-4 BCE) at the beginning of 19 BC. The work went on for more than 60 years after that. When Jesus visited the Temple at the first Passover of his ministry it was said that the place had by then been under construction for 46 years. The work was not entirely finished until 63 AD, only 7 years before the destruction of the entire Temple in 70 AD. www.bible-history.com.

The 7-Years from 2011 would make 2015 possibly then the anticipated forerunner of when the Jewish 3rd Temple could be started and possibly the start of Prophet Daniel's Last Week - yet to be fulfilled. It will be a time of great turmoil for national Israel; a time of 'Jacob's Troubles'.

The context of the 'Last Generation' has to do with the Parable of the Fig Tree directed at Israel - not to the Church, the Body of Christ. A Biblical Generation can be 40, 50, 52, 80, 90 and even 100 years etc. Each time frame has its merit and context. This study uses the 365 day count as the 7 years leading up-to the AD 70-year marker was calculated using 7, 365 day counts. If one adds 1948 years from 70 AD one ends up at 2018 Bull's Eye Moon. Then if 70 years are added to 1948, the year is also 2018. Interestingly Comet Halley appeared in March, 66 AD. Comet ISON will be in full view in 2014. Each are exactly 1948 years apart as well. If one adds the 63 years to 1948 = 2011. On 2011, there was a Central Blood Moon that exactly 7 Years takes you to 2018. The 4 Blood Moons or Tetrads of 2014-2015 could very well mark the countdown to Daniel's 'Last Generation'.
