

Rabbit Anti-CD8 [EP334]: RM0360

Intended Use: For Research Use Only

Description: CD8 molecule consists of two chains, termed α and β chain, which are expressed as a disulphide-linked α/β heterodimer or as an α/α homodimer on T cell subset, thymocytes and NK cells. The majority of CD8+ T cells express CD8 as α/β heterodimer. CD8 functions as a coreceptor in concert with TCR for binding the MHC class I/peptide complex. The HIV-2 envelope glycoprotein binds CD8 α chain (but not β chain).

Specifications

Clone: EP334
 Source: Rabbit
 Isotype: IgG
 Reactivity: Human
 Localization: membrane
 Formulation: Antibody in PBS pH7.5, containing 0.2% BSA and \leq 0.09% sodium azide (NaN₃)
 Storage: Store at 2°- 8°C
 Applications: IHC
 Package:

Description	Catalog No.	Size
CD8 Concentrated	RM0360	1 ml

IHC Procedure

Positive Control: Tonsil
 Concentrated Dilution: 50-200
 Pretreatment: Citrate pH6.0 or EDTA pH8.0, 15 minutes using Pressure Cooker, or 30-60 minutes using water bath at 95°-99°C
 Incubation Time and Temp: 30-60 minutes @ RT
 Detection: Refer to the detection system manual
 * Result should be confirmed by an established diagnostic procedure.

FFPE human tonsil stained with anti-CD8 using DAB
