

## WHEN DARKNESS COMES

By Duane Starkey

When darkness comes upon a land  
It weakens the strength of inner man  
Hope starts failing and joy is soon gone  
Leaving a man with sad feelings all alone  
We still try to work and to just get by  
Often fooling ourselves with some stupid lie  
Things will get better so our leaders say  
While they waste our money every stupid way  
So now we all mutter with bitch and moan  
What happened to our America ever so strong  
Without oil in our lamps that were ever burning  
Shining out our light while the world was yearning  
What a great a success was our democracy  
Just an open book for one and all to see  
We left open the gates while we run and play  
Wondering what happened now that hell is to pay

Well I have the answer to one and all  
God is punishing us because we ignored his call  
He must come first and will not settle for second  
While our continued violations will force us to reckon

Substitute gods and subtle devil worship tools  
Training our youth to be blaspheming fools  
Enticing internet evil at the touch of a finger  
Planting dark thoughts in their minds to linger

So that when darkness comes into their life  
Forcing them to flee from burdensome strife  
Now where can they log-in to the internet  
Frantically searching for answers they will not get  
Wake up America and pound on the drums  
**Let's be prepared when darkness comes**
