Lightning Migration Quickstart

The rapid development and investment of Salesforce on the Lightning platform will enable your business to reach new heights. However, are you currently stuck on the Classic version?

Where do you go from here?

How do you ensure that your current customizations are seamlessly moved over to Lightning?

Further, to increase user adoption and effectiveness, training on the Lightning platform and features will be critical.

Taku's experienced Salesforce and Lightning developers have designed a Quickstart package to tranistion you quickly, while harnessing your current investments and leveraging the new features of Lighting.

Our Quickstart will cover the following areas:

➢ Discovery & Design
➢ Build & Implement
➢ Enablement

Increase Revenue

with Strategic Management Consulting

Optimize Customer Experience

with Salesforce Implementation & Consutling Services

Improve Execution

with On Demand Sales, Marketing & Service Outsourcing

Discovery & Design
➢ Collaborative sessions exploring and mapping out strategic and tactical objectives & goals for the new features in Lightning
