**LIGNAPEAT**  
renewable peat moss replacement™

[www.ReuserInc.com](http://www.ReuserInc.com)

[www.LignaPeat.com](http://www.LignaPeat.com)

Can be used to supplement Peat Moss or Coconut Coir. It can also be used as a direct replacement in propagation or hydroponic growing applications. LignaPeat can be incorporated into the soil and provide long lasting organic matter. LignaPeat is manufactured from 100% Redwood products. Redwood has long been used in growing applications because of its natural resistance to decomposition, thus providing longer lasting beneficial organic matter. Any application, where water retention and air space is desired, LignaPeat will give your plants what they need. We have extensive test data that shows the beneficial properties of LignaPeat. Please feel free to contact us to receive more information.

The mark of responsible forestry

## Environmentally Sound

LignaPeat is a domestically produced organic alternative to mined peat moss. LignaPeat is manufactured from 100% pure, Redwood fiber, harvested from well-managed forests. Our material is captured from the processing of timber. No ecosystems are destroyed for the purpose of manufacturing LignaPeat. Every step of the way LignaPeat falls under US environmental regulations and is manufactured in strict compliance to those regulations.

LignaPeat is a responsible choice that we can all feel good about.

Reuser, Inc. is committed to a responsible use of our environmental resources. We have taken measures to insure this by updating our delivery fleet to reduce our particulate discharge by 80%. Our processing facility and stationary equipment operate with carbon neutral electricity.

We are proud to be part of an earth-friendly movement.

- **Locally Produced-**

This keeps transportation costs down. LignaPeat's ingredients are harvested in California, manufactured close to the source, keeping your dollars close to home. Peat Moss traditionally is imported from thousands of miles away.

- **Reliable availability-**

LignaPeat is manufactured year-round resulting in a more reliable supply. Peat Moss harvest is at the mercy of Canadian winters which makes for volatile availability.

- **Reduced inventory costs-**

With LignaPeat you can order the quantity you need. You will not have to carry a large inventory to insure against shortages in Peat Moss production.

- **Reduced handling costs-**

LignaPeat is available in bulk. No more cutting bales, watering and breaking them apart before you can use them. Our material lands to your facility ready to use, within five business days.
