

TF: 2x2 Therma-Fuser™ VAV Diffusers

The TF Therma-Fuser Diffuser is the most widely specified thermally powered VAV diffuser in the world with more than one million installed.

Stand Alone Square Therma-Fuser™ diffusers provide individual temperature control to precisely match the comfort requirements of each space. Each Therma-Fuser diffuser is its own VAV zone. The thermostats, actuator and damper are built into the diffuser.

With superior air distribution, these diffusers offer longer throws, no dumping, more entrainment, even temperature distribution, higher ADPI and better ventilation effectiveness.

TECHNOLOGICALLY ADVANCED COMFORT

Experience the benefits of high tech, high quality Acutherm products

- Lowest cost per zone of control
- Lowest energy VAV terminal-a green VAV
- Low to no maintenance
- No electrical connection required
- Easily adapts to office changes

The TF Model of the 24" (600m) square Thermally Powered Diffuser available in:

- TF-HC: individual setpoints for VAV heating and VAV cooling
- TF-CW: individual setpoint for VAV cooling with constant volume heating/morning warm-up
- TF-C: individual setpoint for VAV cooling
- TF-D: manually adjustable blade damper
- TF-RA: matching return air diffuser
