

Mud Gas Separation

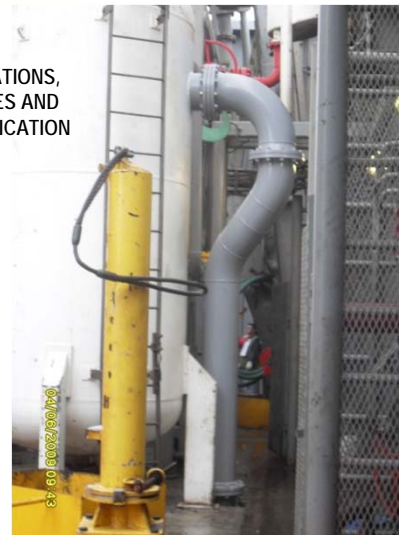

HIGH-PERFORMANCE HORIZONTAL MUD GAS SEPARATORS AND FLOWLINE DEGASSERS

Hampco's proprietary high performance horizontal mud gas separators have been in the field for many years. The superior separating capacity of the horizontal design is now becoming much more recognized in the industry as greater gas handling capacity is required. The same design of units are now also supplied as flowline degassers for the specific purpose of handling riser gas.

Hampco also supplies traditional vertical units to any custom specification and rating and provides all supporting gas-handling analysis of the complete system including mud seal and vent.
