

How can we safely tour All Stars Montessori during the Covid 19 pandemic?

We know that finding childcare can be stressful under normal circumstances, and visiting childcare centers is probably one of the most important things on your list. We are committed to helping parents find quality care for their children during this time and we have revamped our touring process so parents can still come and visit our center.

We will ask that you wear a mask and our director will be wearing one too! Normally, tours can be anywhere from 30 to 45 min in length, we are shortening them up to include a brief but thorough walk through our school, and Any questions that you have can be emailed to our director after your tour or she would be happy to go over everything on the phone.

Once things get back to "normal" you are more than welcome to come back in and have a second tour of the building.
