## ARCHIE & ABBY LOVE IDAHO!

Off to another Great Start in 2025 with Multiple Breed Wins, Group Placements, and 6 Sporting Group Wins this year. Pictured here winning the Sporting Group in Blackfoot, ID under judge James Brown.

## GCHG CH GALEWINNS BRINGING DOWN THE HOUSE (Multi BIS, Multi RBIS, Multi BISS)

GCHB CH Galewinns Rio Grande - GCH CH Galewinns Redtale Fun Is Good OA NAIJ

2025 follows an incredible 2024 - Multiple Breed Wins,  
Multiple Group Placements, and he's now won the  
Sporting Group for the 31st time!

As always, all the credit and thanks go to his remarkable Handler  
Abigail Anderson for her expert handling, grooming, conditioning,  
and most of all, her Dedication and Love for Archie!

Archie is owned and loved by Craig and Dr. Andree Swanson, and  
was bred by Pam and Shea Gale (Galewinns Irish Setters)

# Official Standard for the Irish Setter

## Approved by the American Kennel Club, August 14, 1990

The Irish Setter is an active, aristocratic bird dog, rich red in color, substantial yet elegant in build. Standing over two feet tall at the shoulder, the dog has a straight, fine, glossy coat, longer on ears, chest, tail and back of legs. Afield he is a swift-moving hunter; at home, a sweet natured, trainable companion.

At their best, the lines of the Irish Setter so satisfy in overall balance that artists have termed it the most beautiful of all dogs. The correct specimen always exhibits balance, whether standing or in motion. Each part of the dog flows and fits smoothly into its neighboring parts without calling attention to itself.

**Size, Proportion, Substance** - There is no disqualification as to size. The make and fit of all parts and their overall balance in the animal are rated more important. 27 inches at the withers and a show weight of about 70 pounds is considered ideal for the dog; the bitch 25 inches, 60 pounds. Variance beyond an inch up or down is to be discouraged.

**Proportion** - Measuring from the breast bone to rear of thigh and from the top of the withers to the ground, the Irish Setter is slightly longer than it is tall. **Substance** - All legs sturdy with plenty of bone. Structure in the male reflects masculinity without coarseness. Bitches appear feminine without being slight of bone.

**Head** - Long and lean, its length at least double the width between the ears. Beauty of head is emphasized by delicate chiseling along the muzzle, around and below the eyes and along the cheeks.

**Expression** - Soft, yet alert. **Eyes** somewhat almond shaped, of medium size, placed rather well apart, neither deep set nor bulging. Color dark to medium brown. **Ears** set well back and low, not above level of eye. Leather thin, hanging in a neat fold close to the head, and nearly long enough to reach the nose.

The **skull** is oval when viewed from above or front; very slightly domed when viewed in profile. The brow is raised, showing a distinct stop midway between the tip of the nose and the well-defined occiput (rear point of skull). Thus the nearly level line from occiput to brow is set a little above, and parallel to, the straight and equal line from eye to nose.

**Muzzle** - Moderately deep, jaws of nearly equal length, the underline of the jaw being almost parallel with the top line of the muzzle. Nose black or chocolate; nostrils wide. Upper lips fairly square but not pendulous. The **teeth** meet in a scissors bite in which the upper incisors fit closely over the lower, or they may meet evenly.

### Neck, Topline, Body

**Neck** moderately long, strong but not thick, and slightly arched; free from throatiness and fitting smoothly into the shoulders.

**Topline** of body from withers to tail should be firm and incline slightly downward without sharp drop at the croup. The **tail** is set on nearly level with the croup as a natural extension of the topline, strong at root, tapering to a fine point, nearly long enough to reach the hock. Carriage straight or curving slightly upward, nearly level with the back. Body sufficiently long to permit a straight and free stride. Chest deep, reaching approximately to the elbows with moderate forechest, extending beyond the point where the shoulder joins the upper arm. Chest is of moderate width so that it does not interfere with forward motion and extends rearwards to well sprung ribs. **Loins** firm, muscular and of moderate length.

**Forequarters** - Shoulder blades long, wide, sloping well back, fairly close together at the withers. Upper arm and shoulder blades are approximately the same length, and are joined at sufficient angle to bring the elbows rearward along the brisket in line with the top of the withers. The elbows moving freely, incline neither in nor out. **Forelegs** straight and sinewy, strong, nearly straight pasterns. **Feet** rather small, very firm, toes arched and close.

**Hindquarters** - Hindquarters should be wide and powerful with broad, well developed thighs. Hind legs should be long and muscular from hip to hock; short and perpendicular from hock to ground; well angulated at stifle and hock joints, which like the elbows, incline neither in nor out. Feet as in front. Angulation of the forequarters and hindquarters should be balanced.

**Coat** - Short and fine on head and forelegs. On all other parts of moderate length and flat. Feathering long and silky on ears; on back of forelegs and thighs long and fine, with a pleasing fringe of hair on belly and brisket extending onto the chest. Fringe on tail moderately long and tapering. All coat and feathering as straight and free as possible from curl or wave. The Irish Setter is trimmed for the show ring to emphasize the lean head and clean neck. The top third of the ears and the throat nearly to the breastbone are trimmed. Excess feathering is removed to show the natural outline of the foot. All trimming is done to preserve the natural appearance of the dog.

**Color** - Mahogany or rich chestnut red with no black. A small amount of white on chest, throat or toes, or a narrow centered streak on skull not to be penalized.

**Gait** - At the trot the gait is big, very lively, graceful and efficient. At an extended trot the head reaches slightly forward, keeping the dog in balance. The forelegs reach well ahead as if to pull in the ground without giving the appearance of a hackney gait. The hindquarters drive smoothly and with great power. Seen from the front or rear, the forelegs, as well as the hind legs below the hock joint, move perpendicularly to the ground, with some tendency towards a single track as speed increases. Structural characteristics which interfere with a straight true stride are to be penalized.

**Temperament** - The Irish Setter has a rollicking personality. Shyness, hostility or timidity are uncharacteristic of the breed. An outgoing, stable temperament is the essence of the Irish Setter.
