

Monitoring Violations Annual Notice

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Requirements Not Met for: CITY OF NEW SUMMERFIELD

Our system failed to confirm that the required monthly coliform samples had been received by the sampling lab and testing conducted. Although this incident was not an emergency, as our customers, you have a right to know what happened and what we are doing to correct this situation.

We are required to monitor your drinking water for specific contaminants on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During December 2021, we did not confirm completion of all monitoring and/or testing for coliform bacteria and therefore cannot be sure of the quality of your drinking water during that time.

What should I do?

There is nothing you need to do at this time. You may continue to drink the water. If a situation arises where the water is no longer safe to drink, we are required to notify you within 24 hours.

What is being done?

We continue to document samples when they are conducted and follow up, as necessary, with the testing lab to confirm samples have been received and/or in testing process status. Water quality sampling results are available for review at City Hall.

For more information, please contact the New Summerfield Utilities Director at (903) 726-3651 or come by City Hall (13280 Hwy 110N, New Summerfield, TX. 75780).

Please share this information with anyone who may drink this water that may not have received this notice directly.

This notice is being sent to you by the CITY OF NEW SUMMERFIELD.

Public Water System ID#: TX0370028.
