QUALITY ENGINEERED ALLOYS

QUADGOUGE 100

- Ideal for Stainless Steels
- No Compressed Air or CO₂
- Works on All Metals
- All Position
- Low Carbon Infusion
- Cuts & Gouges Cast Irons
- Surfaces Ready to Weld
- Economical to Use

DESCRIPTION

Quadgouge 100 is an economical, effective electrode which is designed for high speed cutting, gouging and piercing without the benefit of compressed air or oxygen. Surfaces are ready to weld and do not require special preparation before welding. Quadgouge 100 may be used in all positions without the characteristics side blow common to arc/gouge electrodes. The specially formulated coating protects the electrode from overheating.

APPLICATIONS

- Boiler Tubes
- Mill Rivets
- Cast Housings
- General Maintenance and Repair

TECHNICAL DATA

Current: AC/DC Straight Polarity

AVAILABILITY

3/32", 1/8", 5/32"
