Course Objectives:

The Certified Petroleum Safety, Health and Environmental Specialist – for refineries, plants, and storage safety facilities indicates a high level of proficiency and is one of the highest levels of certification offered by Podojil & Associates, Inc. This certification is an indication of a level of proficiency expected of a safety professional who is capable of developing and managing a comprehensive facility

wide or corporate safety program for petroleum pipeline construction, operation, and maintenance through the facility lifecycle and closeout decommissioning.

Learning Outcome:

The student will function as a key team member or team leader who provides, implements, and / or reviews regulatory checklists, inspection reports, and required documents. The student will serve as an onsite inspector to assure regulatory requirements are addressed properly during construction and to provide verification that operational regulations are being met on a daily basis and through effective program management.

Audience

This course will be valuable for:

- Refinery Industry Workers
- Safety, Health and Environmental Professionals,
- Safety & Health Committee Members
- Government Inspectors
- Refinery General Industry and Construction Managers & Supervisors
- Training Managers
- Industrial Hygienists
- Environmental Professionals

Testing:

Students completing the course must take a proctored final exam. A score of 80% on the final exam is necessary to receive your personalized certificate of completion. The student gets three (3) attempts to pass the course.
