

Ultrasound Workshop

Description

You will learn the basics of using ultrasound in the ED for vascular access. Ultrasound is a valuable tool in the ED and you will learn the ABCs of using it to see your needle go in a vein in real time. Each of you will place an IV on a phantom model and then we will apply what you have learned to placing central lines.

How to Prepare

There is no reading assignment for this workshop.

Speaker
Jason Mansour, MD, FACEP
