Happy Saturday,

I hope this finds you well and safe. Times are a bit strange right now for all of us. Sending you this email to let you know relevant tax facts and will probably follow up with more emails.

Here are some important **facts**:

- The federal government **has** changed the IRS filing date and payment due date to July 15th, 2020. You do not have to file an extension at this time for the federal. More will come on what to do if you still need more time to file.
- *The State of Idaho has NOT updated* their filing date yet. I will try to put out another email when/if they do.
- There is only talk of a stimulus but nothing has passed congress. So, don't count on cashing checks not received. So much bad press is going around.
- Fraudsters are out in force. Please be careful! The IRS or State or Social Security Administration will never call you without you calling them first.

As far as Family Tax Solutions:

- I am still open and preparing taxes.
- I have a secure portal on my website for you to upload your tax documents. Limiting exposure is very important! <http://www.familytaxsolutions.com>
 - I can even have you sign your tax return either electronically or by mail. Payment would need to be made before mailing and you can call me with that information.
- I am still seeing clients but, do not come if you are ill or around someone who is ill. We can do all your taxes through the portal.
- I sanitize my office between all appointments including my pens and door handles. I have scored super high in the mothering instincts category (if there is such a category) and I need to protect all my clients as well as my family.

Please contact me if you have any questions. You can email me or call me. I so appreciate all of you and look forward to all of this passing soon. Remember you are not alone.

Best Regards,

Robin Gervais
