JRTPR LLC provides Architectural/Structural Engineering consulting and structural repair services with a strong focus on both new construction and for existing facilities such as NASA's. Our experience ranges from structural diagnostics of existing facilities to structural consulting in concrete and steel structures, in an international, multiple country setting.

Our Services

Structural Diagnostics

- Existing facility as built and damage schedule preparation
- Destructive and non-destructive testing of concrete structures
- Preparation of repair application procedures
- Corrosion mitigation and prevention procedure preparation

Structural Engineering

- Structural engineering design of concrete/steel structures,
- Structural consulting and value engineering
- Structural peer review
- BIM modeling capabilities

Construction Services

- Pre-construction services including cost
- estimating, scheduling and project planning
- Construction supervision/inspection
- Steel fabrication and Precast concrete QA/QC
