

FLORIDA KIT

SECURITY GUARD SCHOOL SYLLABUS DETAIL & HOURS 2020 CURRICULUM

ATTENTION there are **FOUR** important factors regarding our lesson plans content and hours:

1. The Florida Kits are specifically designed for Florida and include required Florida Statutes.
2. The 50-State Kits are designed to meet the class requirements for all other States except that the legal section is generic. That means you need to look up your state's laws and teach the statutes that your State requires, which are free and easy to find.
3. The curriculum outline in the table below is VERY high-level. Your state requirements may list topics you might not initially recognize in the table below but that nevertheless are included within one of these topics. For example, the "**Crime & Acc Prevent**" topic listed as component # K below includes a variety of sub-topics such as *Active Shooter Prevention & Response, OSHA, Hardware and Lock System, Alarm Systems*, etc. So if you do not see a topic you need to teach, check the curriculum detail in the pages that follow the table.
4. The "*Minimum*" and "*Maximum*" hours indicate the time range for each section as per this logic:
 - a. **Minimum:** Corresponds to the least amount of time it takes to read the section or cover the essentials. You can always go below the minimum by only teaching the sub-topics your State requires
 - b. **Maximum:** Corresponds to the amount of time when trainer and students share experiences and discuss events of techniques in greater details. You can always stretch it beyond these hours, but it may take away from the primary topics.
