

TL: Linear Slot Therma-Fuser™ VAV Diffusers

These streamlined aluminum extrusions provide slim architectural shape as well as individual temperature control. Just like square Therma-Fuser™ diffusers, each linear Therma-Fuser™ diffuser is a separate zone of VAV control. The thermostats, actuator and damper are built into the diffuser.

With superior air distribution, these diffusers offer longer throws, no dumping, and more entrainment, even temperature distribution, higher ADPI and better ventilation effectiveness.

TECHNOLOGICALLY ADVANCED COMFORT

Experience the benefits of high tech, high quality Acutherm products

- Lowest cost per zone of control
- Lowest energy VAV terminal-a green VAV
- Low to no maintenance
- No electrical connection required
- Easily adapts to office changes

The TL Model of the Linear Slot Thermally Powered Diffuser available in:

- TL-CW: individual set point for VAV cooling with constant volume heating/morning warm-up
- TL-C: individual set point for VAV cooling
- TL-D: manually adjustable blade damper
- TL-RAP: matching return air for plenum return
- TL-RAD: matching return air for ducted return
