Anne White, P.E.

Senior Electrical Engineer

Project Manager

Professional Experience:

As a Senior Electrical Engineer and Project Manager, Anne has designed and managed a variety of existing building renovations and new building designs. With over 9 years experience in the industry, she has worked on recreational centers, schools, senior living facilities, restaurants, offices, industrial facilities, multi-family and retail buildings. In addition to her experience as an engineer, Anne spent a number of years working as a general contractor on federal, multi-family and healthcare projects. She has experience working on projects in several different states including Colorado, Arizona, Texas, North Carolina, Virginia, New York, Maryland and Washington DC. Her wide range of experience and desire to meet and exceed client expectations makes her an invaluable asset to the project team.

Anne is a licensed professional engineer and a LEED accredited professional.
