

RESEARCH, EVALUATION & SOCIAL SOLUTIONS, INC.
ENGINEERING THE DEVELOPMENT OF NEW DIGITAL LEARNING AND COMMUNICATION TOOLS FOR HEALTH SM

About REESSI

REESSI is a faith-guided private research firm that was founded in 1985. REESSI has acquired and managed more than \$30 million dollars in service-related grants and contracts with U.S. federal and local governments & the private sector. Our mission is *to investigate, design, build, evaluate and diffuse pragmatic digital learning and communication solutions that lead to cumulative and sustained health and wealth in under-resourced populations.*

Our corporate aims are:

- 1) To use new digital media to support children, youth and young adults from under-resourced families and communities in a positive transition to and through adulthood.
- 2) To use digital education and virtual social networking mechanisms to build the competence and capacity of public health workers to plan and implement successful population-based programs.
- 3) To use mobile technology to improve patient-centered care through patient education

Our Environment

REESSI operates in a fully automated microcomputer-based environment that features Apple computers and MAC operating systems. All of REESSI's personnel are computer literate and have hands-on experience in word processing, database management, spreadsheet, communications, graphics, statistical analysis and/or accounting software applications. REESSI's telecommunications capability permits direct access to an unlimited number of electronic bulletin boards, archival databases, and search engines. The company also has access to academic-based search engines and databases through an academic partnership with University of Miami School of Medicine.

Responsibilities

Oversee data collection activities for REESSI projects.
Oversee data analyses activities for REESSI projects.
