100% Fresh Fruit Powder  
and Extracts.

**Welcome to GoWild Australia Pty Ltd (Australia)**, a subsidiary of GoWild Australia LLC (USA), whose business model is built upon supplying premium-quality Australian native food and medicinal plant ingredients that have been sourced sustainably, traceably, and authentically in partnership with local Aboriginal supply communities. Two of the managing directors of GoWild Australia Pty Ltd, Robert Forbes and Robert Dean, are the Australian co-founders of Coradji, the original Australian company that began responsibly procuring gubinge fruit from the greater Broome area 20 years ago. Today, the Bidyadanga fruit is being used as a all-natural ingredient in body care products, superfoods, medical research, and all natural preservative systems.

### **SUSTAINABLE. PURE. TRANSPARENT.**

Our GoWild-Gubinge Powder and Extract products are derived from sustainable wild harvested fruit or plantation grown on traditional Aboriginal land. It is produced for the Gubinge fruit, harvested from remote regions of Western Australia and the top end of the Northern Territory. Each lot is traceable to its traditional community sources.

### **A Super Food – The World’s Richest Natural Plant Source of Vitamin C and Ellagic Acid**

There is no plant in the world that has the same level of Vitamin C, anti-oxidants, and bioactives, none of which are lost through our state-of-the-art proprietary processing methods. Gubinge fruit contains phytochemicals such as gallic and ellagic acids. These polyphenols have antibacterial, antiviral and antifungal activities and also show anti-inflammatory properties.

### **Traditional Uses**

Has been a traditional source of bush tucker, the bark was used as an antiseptic, and a wound healing remedy for the Aboriginal people for thousands of years. Today the trees are still in great abundance and come to fruit at the start of the wet season in November.

### **GoWild-Gubinge has been found to contain over 50 various identifiable nutritive compounds**

While there are other natural fruits that contain antioxidants, Gubinge fruit is unique because it contains both hydrophilic (water soluble) and lipophilic (oil soluble) antioxidants. This combination of antioxidants is much more bio available to the skin, delivering much more comprehensive protection from oxidative stress than fruits that are comprised of only hydrophilic compounds. Gubinge fruit also contains Folate (Vitamin B9) which plays a key role in the repair and synthesis of DNA, and can help to protect the cells from damage. Gubinge fruit with this rich composition of phytochemicals and microelements, helps protect against effects of premature aging.

Purity. Quality. Transparency.

100% Whole Fresh Fruit Powders and Fluid Extracts  
GOWILD AUSTRALIA ONLY USES THE FRESHLY HARVESTED  
AND FREEZE-DRIED PULP, **NEVER THE KERNEL.**
