

2021 HYDRO RECORD BOOK AND STATISTICS

PUBLISHED BY THE
UNLIMITED NEWSJOURNAL

Gar Wood (left) sits at the steering wheel of his *Miss America X* and next to his long-time riding mechanic, Orlin Johnson. Built in 1932, the massive boat was created to defend the Harmsworth Trophy from an expected challenge by Lord Charles Wakefield's new *Miss England III* and its driver, Kaye Don. Nearly 40 feet in length, just short of the maximum allowed by Harmsworth rules, the boat weighed about eight tons and was powered by four 12-cylinder Packard engines that together generated 6,400 horsepower. One eyewitness to its launching and first test run on the St. Clair River said, "It was epochal. That boat was writing the history of daring in the waters of that turquoise river. We came away speechless at the drama of it all." Racing on Lake St. Clair, Gar Wood drove the boat to victory in both heats of the 1932 Harmsworth and later that month drove the boat through a mile course set on the St. Clair River and set a new world straightaway speed record of 124.86 mph. A year later, in a defense of the Harmsworth on the St. Clair River near Marine City, Michigan, Wood drove the boat to victory over Hubert Scott-Paine and his *Miss Britain III*. It was the last race the legendary Gar Wood would enter.

Records vs. Statistics A record is an achievement that is officially recognized. In almost all cases, the driver or owner will receive a trophy or certificate indicating that the race has been won or a record has been established. A statistic is an unofficial achievement. The statistical rankings included in this publication were developed through the analysis of heat results and other statistical data.

What is a race? The information in this Record Book includes the results of all "official races" that took place since 1922, which is when the Gold Cup class was established. It also includes Gold Cup races and some Harmsworth races that were held previous to 1922. To be counted among the 710 official races listed here, an event must meet two conditions: 1) at least three starters of the Unlimited-class, Gold Cup-class, the 725-class in Mississippi Valley Power Boat Association events, or equivalent; and 2) at least two heats of racing. The results of free-for-all events, for example, which were just one heat and were common during the years before World War II, are not counted in these records. Many exhibition races included several limited-class boats but only one or two Gold Cup-class boats and also wouldn't be counted in these records.

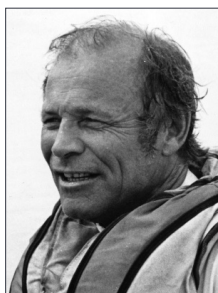

Who's the driver? In the case where more than one person handled the steering wheel during an event that ended up being a victory for that boat, the person who drove the boat in the event's last heat is given credit for the win.

RACE TEAM STATISTICS

What is a race team? An individual boat earns a different set of performance statistics for each of its owners. For example, if a boat is owned by three different owners during its career, it would be a part of three different race teams and would accumulate three separate sets of statistics. The following statistics are from races held since World War II.

MOST RACE APPEARANCES:

NAME(*) [Year hull was built/Seasons with race team]
