## **Robert C. Neff, Jr.**

President

Chevron Middle East, Africa, South America Exploration and Production Company

Robert C. (Clay) Neff, Jr., has been promoted, effective October 1, 2022, to President, International Exploration & Production, and is currently president of Chevron Middle East, Africa, South America (MEASA) Exploration and Production region, based in Houston, Texas, a position he assumed July 1, 2020. He is responsible for Chevron's oil and gas exploration and production activities in the region.

Previously, Neff was president of Chevron Africa and Latin America Exploration and Production Company (CALAEP), responsible for Chevron's oil and gas exploration and production activities in Africa and Latin America; managing director of the Nigeria Mid-Africa business unit, where he oversaw the company's oil and gas exploration and production activities in the area. While in Nigeria, Neff served as chairman of the Oil Producers Trade Section of the Lagos Chamber of Commerce and was chairman of the Board of Trustees of the Foundation for Partnership Initiatives in the Niger Delta.

From 2009 to 2014, Neff was part of Chevron's Southern Africa strategic business unit, initially as Production Operations manager, where he oversaw the company's shallow and deepwater operations, and later as Asset Development general manager, where he was responsible for exploration, development and new ventures activities in Angola, Republic of Congo and the Democratic Republic of Congo.

Prior positions include general manager of Operations for the Gulf of Mexico business unit, general manager of Asset Development for the San Joaquin Valley business unit and manager of Chevron's North America Midstream business.

Neff joined Chevron in 1985 as a drilling engineer for the Gulf of Mexico business unit in Lafayette, Louisiana, after earning a bachelor's degree in petroleum engineering from Louisiana State University.

Neff serves on the boards of the Houston Zoo, the Council of the Americas and the Corporate Council on Africa, among others. He is also a member of the University of Houston Energy Advisory Board, the Louisiana State University, College of Engineering Dean's Advisory Council, and the Advisory Board of the Bilateral Chamber.

Put it on your calendar now so you don't miss it. We are going to have a great time seeing old friends, making some new ones, eating some delicious food, and learning what Chevron is up to now. It promises to be a fantastic way to cap a very good year for our chapter.
