

Limited Time!

\$11.75 Adult and \$9.75 Child

Need To Warm Up? They Do Too!

Dolphins share a lot of physical similarities with humans. Did you know they shiver like us when they feel cold? Without fur, dolphins rely on their thick layer of blubber to keep them warm. They also swim to warmer areas in the ocean or increase their activity to circulate heat through their bodies. Catch them in action during the Zoo's Dolphin Presentations at 10:30am and 2:30pm daily in the Ascension St. Vincent Dolphin Pavilion!

START THE YEAR OFF RIGHT WITH AMAZING SAVINGS!

Exclusive Off-Season Pricing

Now through March 18

Adult: \$11.75 | Child (2-12): \$9.75

Zoo Hours:

Now through March 19

9am-4pm Daily

ARCTIC FOX FUN FACT!

Arctic Foxes are well-known for their thick, snowy-white fur that helps them blend into colder climates. Underneath all that fur, they actually have dark-colored skin -- just like polar bears! The darker pigmentation helps them absorb and retain body heat easier, especially in frozen environments. Grab your winter coat and meet our Arctic Fox in the Flights of Fancy Rotating Habitat!
