

Roads and Maintenance

The April 26, 2017 early morning storm that came thru our area had a wide range of impacts including damaging winds, heavy rain and power loss. We started early with our first priority focused on getting the roads passable. There were several trees and limbs that had to be removed. There is still one location (Gainer and Black Oak) where a tree is on the power lines, which has been called in for removal. There were also several locations where water runoff was flowing over the roadway or large pools had formed. As the day passed some of these worsened.

We are underway with roadway cleanup after evaluating all the roadways yesterday. If there is a tree or limb blocking the roadway please call us, otherwise we will get to your area based on the developed clean-up plan.

Thanks to all of you who had cleaned out your property drainage ditches and driveway culverts. That made a huge difference. As we evaluated the roadways we could see the benefit of your efforts, plus there were less overflow areas. THANK YOU!!

There is still a lot of work for us to do that will take several days to complete. The roadways are passable however: BE CAREFUL OUT THERE.
