

## SENIOR SECONDARY ENGINEER

### Location

Melbourne area

### Position Description

We are currently seeking 2 senior secondary Electrical Engineers. This is a position that offers the right person technical leadership within the business.

You can expect to be working with strong multi-disciplinary engineering and design teams across a range of high profile power projects.

### Duties & Responsibilities

*This position will include and not be limited to:*

- Experience in secondary systems design both MV, HV and EHV systems
- Liaising with relevant business stakeholders
- Minor financial and business management of the team
- Conceptual designs for protection schemes
- Power System protection and control detailed design
- SCADA design
- Protection settings and configurations
- Metering design
- IEC 61850 implementation and design (an advantage but not mandatory)
- RPEQ and CPENG (an advantage but not mandatory)
- Possible secondment opportunities

### Skills & Experience

We are seeking 2 individuals who have excellent technical ability and are comfortable speaking with clients. The individuals should also be open to secondment opportunities in the Melbourne area.

You should be experienced Senior Electrical Engineer, ready to take the next step, with a demonstrated history of success in project delivery. We are ideally seeking a candidate who will possess a tertiary degree qualification relevant to electrical engineering, ensuring that the individual possesses the necessary skills for the role.

### Culture & Benefits

The successful candidate will be given the opportunity to work in a progressive and flexible work environment and the opportunity to work on a wide range of exciting projects with some high profile clients. We have a fantastic team with most employees either of senior level or higher.
