

MRF reports a big win in the U.S. house, H.R. 2 the highway bill protects motorcyclists from profiling by stopping funding of Motorcycle only checkpoints and helps collect data on motorcycle profiling . It also contains protections from autonomous vehicles and sets up a Motorcyclist Advisory board. The bill now goes to the senate. The so- called auto insurance reform is now in effect and motorcyclists are at extreme risk of financial ruin. I don't understand why these senators can't see how unfair this is to motorcyclists, I can only think this is just a political tactic. I have read that the rates in Detroit will remain high. Lower rates in Detroit was one of the selling points, so even that was not accomplished by this crappy insurance law. We still will be able to sue, but you really think you'd be getting anything out of someone who probably bought the least expensive insurance because that's all they could afford?

The field meet will be held next weekend and I'm sure it will be a great one, sadly as it looks at this time, barring some miracle, for the first time in 40+ years I won't be attending. For me this has been the lost summer, and I'm very angry over the government's handling of this deadly pandemic.
