

So Lite Lightweight Wheelchair

Freedom and functionality at a fraction of the weight!

\$699.00

An Ultralight Wheelchair with Heavyweight Features

A Wheelchair That Takes Safety to the Next Level

Features designed for added safety include a dual braking system with manual locks (and front brakes to prevent the chair from moving when you don't want it to), front caster wheels (for added maneuverability), two anti-tipping rear wheels (for added balance and support) and flat-free tires (no maintenance required.) A first-time user told us in amazement, "I could easily do the smoothest 360° turn, right in place."

Developed with Simplicity and Comfort in Mind

Features designed for added convenience and comfort include flip-back armrests so you can roll right up to a desk or table; padded and durable seat and back cushions that remove for quick cleaning; and – to make the So Lite Wheelchair incredibly easy to transport or store – a flip-down backrest and removable, quick-release rear wheels, footrests and anti-tippers. It even folds and slides easily into your backseat or trunk! All this, with about 1/4 the weight of a standard wheelchair and a weight capacity of 250 pounds.

Detailed Specifications

- + Chair frame weighs only 16.5 pounds
- + Frame crafted of magnesium for strength and light weight
- + Dual braking system featuring manual locks and hand brakes
- + Folds easily for convenient transportation and storage
- + Comfortable yet durable cushions that can be removed for cleaning
- + Flip-back armrests for the ability to roll up closely to a desk or table
- + Easy quick-release rear wheels, foot rests and anti-tippers
- + Free stylish and comfortable back and seat cushions
