

Our 5 step “Green and Clean” program gets proven results!

“We are your local, trustworthy, lawn service provider.”

- 1. Early Spring= Granular slow release fertilizer with crab-grass preventer**
-this application provides time release nutrients to your lawn as it emerges from dormancy and prevents germination of grassy-type weeds.
- 2. Late Spring= Slow release fertilizer with broadleaf weed control**
-this application provides continual nutrients to your lawn, as well as eliminating a wide range of broadleaf weeds. **customers who opt for only broadleaf control do not receive fertilization application.*
- 3. Mid-Season=Application of slow release fertilizer with optional grub control**
-this fertilizer is specifically formulated to help alleviate stress which can occur during extended summer months. **grub control can be added to prevent grub damage to your lawn*
- 4. Early Fall=Slow release fertilizer with broadleaf weed control**
-this application will revitalize your lawn and take care of any broadleaf weeds which may have sprouted during the season.
- 5. Late Fall=Slow release winterization fertilizer**
-this is our final application of the season which will ensure the plants have plenty of stored nutrients to recover from dormancy in the spring.
