

Fawzia came into contact with ATN on 15th September 2017 seeking careers advice and guidance. A drop in face-to-face meeting was arranged with the NCS Adviser for her. She had an in depth discussion and found the one-to-one session with the adviser to be very useful. She came across as very ambitious with an aim to study at a university. Her initial interest was in Biomedical Sciences. She was given relevant links to different universities that provided the course she was interested in. She also had an opportunity to familiarise herself with the entry requirements which were level 2 qualifications in Functional Skills English and mathematics.

She straightaway expressed her desire to enrol on one of the two courses on offer. She was hence referred to ATN's admin team. After conducting the initial diagnostic tests she was enrolled on Functional skills Maths level 2 course. On successful completion she enrolled on Functional Skills English level 1 followed by level 2 in May 2018. She continued her learning at ATN and completed Level 1 Award in IT Users and Level 2 Deliver Customer Service.

Fawzia said: "I am glad I came to ATN and learnt so much. I have gained invaluable experience and useful qualifications at ATN which have acted as a stepping stone towards my dream of studying at a university. I have secured a place at the University of West London. I have had a change of heart on the qualification and I am now pursuing a qualification in accounting. I have a clear aim of completing my degree in accounting and without ATN's team, their advice and guidance, I would have struggled and might not have been able to secure a place at university starting this September."
