

Innovative Solutions for Microscopy

Date

Friday March 15, 2019

Time

9:00 - 10:00am

Location

LSE232

RSVP

events@azmicroscopy.org

Breakfast will be provided

**Hosted by the Keck
Bioimaging Facility**

Ibidi: Tools for Live Cell Imaging

Live cell imaging is a powerful tool in demonstrating cell function and morphological change. Specialized equipment and resources are needed to obtain high quality images. Ibidi provides an extensive collection of microscope chamber slides, specific for live cell imaging. Join us as Ibidi co-founder, Dr. Ulf Radler describes the tools and techniques necessary to obtain professional quality live cell videos.
