

Early Learners Centre Pre School

Sick Children

Parents and carers must inform the Pre School when their child is unwell or suffering from any medical conditions, this is for the benefit of all children and staff that attend Early Learners Centre Pre School. If a child attends the Pre School and is clearly unwell then arrangements will be made to contact their parent/carer, for this reason it is extremely important that all contact details are kept up to date and the Pre School is informed of any changes.

If you are contacted to collect your child from Pre School, we appreciate there may be a delay before you arrive and generally this is acceptable, your child will be as comfortable as possible in the meantime whilst they remain at the Pre School. If however you cannot come in person to collect your child we ask that you have an alternative parent/carer who can be contacted and asked to collect the sick child.

Diarrhoea/Vomiting

If your child has had diarrhoea or sickness they will be excluded from the Pre School for 24 hours. If you are asked to collect your child from Pre School because of this, your child will not be able to attend the following day.

Anti-biotics

If your child is prescribed anti-biotics they cannot be admitted to Pre School for the first 48 hours. All children react differently to medicines and generally if they are taking anti-biotics they need time to adjust to the medication.

Throat, Eye and Ear Infections

If your child is suffering from any of the above they may not attend Pre School. They are all highly contagious and medical treatment must be sought. If they are prescribed anti-biotics please see the above policy.

Any contagious illnesses please contact Charanjit or the Pre School manager on 07572504852

EMERGENCY TREATMENT

In the case of a medical emergency, where your child may need urgent medical treatment, staff will contact the emergency service required or indeed take the child to the nearest casualty unit. A second member of staff will contact the parent/carer to inform them. If necessary a member of staff will travel with your child to the hospital/unit where they will wait for the parent/carer to arrive.
