

# SMOOTH SKIN IS IN

When it comes to having healthy, smooth, hair-free skin, you can't beat professional BODY SUGARING.

Sugaring is a safer, healthier alternative to waxing. More and more women (and men) are bearing it all, and removing hair from anywhere and everywhere!

The art of sugaring has been around for thousands of years, since ancient Egyptian times. It is a true art form, one that Sugar Blossom Salon has perfected. This new establishment, conveniently located at Keele and Rutherford Rd, is the only business of it's kind in Vaughan, to offer and specialize in Body Sugaring.

Owner, Susan Campanella says "once you've tried sugaring, you'll never want to wax again." She adds "You'll tell everyone you know how much you love being sugared!" Sugar Blossom receives visits from men and women both near and far craving their 'sweet' treatments and there are plenty of reasons why.

The sugaring paste is 100% natural. Unlike wax, made primarily of resins, artificial fragrances, dyes, chemicals, and preservatives, this is an all natural paste made from a blend of sugar, lemon & water. It's completely hypoallergenic and hygienic and there are no chemical additives. The paste is gently massaged onto the skin at luke-warm temperature to avoid burns. With a flicking motion, the hair follicle is then removed from the root in the natural direction of the hair growth leaving your skin smooth and exfoliated. This technique requires only 2 to 3mm of hair growth, so hair can be removed much earlier, minimizing unnecessary discomfort, irritation and ingrowns. This explains why sugaring of the more delicate regions like the face and brazilian have become the most popular.

Men and women of all ages, skin types and hair textures can enjoy the benefits of this safe, gentle and effective method of hair removal.

So get ready for summer and feel what all the buzz is about..... GET SUGARED!

The Sugar Blossom team invite you to experience their full skin care services like their famous sea-salt exfoliation & authentic Hungarian mud treatments. They also carry a full line of all-natural skin care products, all of which are Canadian made, and are sure to compliment your healthy, hairfree lifestyle this summer.

## SWEET FACTS!

SUGARING	VS	WAXING
Sugaring pulls the hair out in the natural direction of hair growth, taking the hair out by the root. The result is less pain, less rashes and less ingrown hairs.		Waxing pulls hair out against natural hair growth resulting in more hair breakage, pain, rashes and ingrown hairs.
Sugar is 100% natural with no chemical additives, no wax resins and no unnecessary essential oils. It is safe to use on all skin and hair types.		All wax products contain resins and may not be suitable for all skin and hair types.
Sugar is hygienic. One ball of sugar can remove hair from a large area of the body and is applied with a gloved hand. No spatula or cotton strips are required - NO DOUBLE DIPPING!		Waxing requires a spatula to apply over and over again and may lead to Double Dipping. This could potentially cause cross-contamination.
Sugar is applied at barely lukewarm temperature.		Hot wax can burn and bruise the skin.
Sugaring does not stick to live skin cells. It is so gentle it can be used on any part of the body - No matter how sensitive!		Adheres to live skin cells increasing the risk of tearing the skin and reddening. It can be risky to use in sensitive areas.
Sugaring is Hypoallergenic and a natural healer of the skin.		Waxing damages fine tissue cells.
Sugar is water-soluble, so clean up is a breeze.		Wax requires solvents to clean it off of your skin.
Sugaring requires shorter hair growth (only 1/16" or 2mm), ensuring that the hair has less time to re-establish strong growth. This means less pain and less unsightly hair!		Wax requires longer hair growth, permitting the hair to re-establish strong growth. This means more pain and more hair!
