COVID / Visitation Update

Greetings from Midway Nursing Home!

We have no new positive COVID cases, and no residents are displaying any symptoms.

Our 2 visiting sessions have been expanded to 1 hour and the schedule remains Monday thru Friday with each floor having its own designated weekday. Additional days/sessions will be added in the future as our resources & spacing becomes available.

All visitors will be screened upon arrival and since the CMS COVID positivity rate for Queens County continues to be over 5%, rapid COVID testing for every visitor is offered upon arrival as it is highly recommended by the DOH & CMS and is for the protection of our residents.

Visitors are being asked to present a photo ID and, if you have received the COVID-19 Vaccine, a copy of the Record Card will be taken. Please note that you are not considered fully vaccinated until 2 weeks after you have completed the second dose for Pfizer or Moderna vaccines, or 2 weeks after a single-dose Johnson & Johnson Janssen vaccine.

We are in the process of securing COVID vaccination proof from visitors so that we can soon coordinate visitors and residents that are fully vaccinated in a designated area where barriers will be removed and hand holding, or hugging can be enjoyed! For visitations where any visitor or resident are not fully vaccinated, barriers will remain in place and social distancing maintained throughout the visit. Masks covering the mouth and nose must always be worn when on Midway's premises regardless of vaccination status.

Residents on quarantine are not permitted visitors. Any visitors who are sick or have been exposed to a person with COVID should not visit until they have recovered or have passed the quarantine period.

To schedule an in-person visit, please call Connie Leone on x307.

Virtual/Facetime visits are available daily – to schedule one, please speak with the Social Services or Recreation staff.

We look forward to seeing you soon!
