

## MODEL H-LTCS Core 7 Based System Laptop Computer

### **Description**

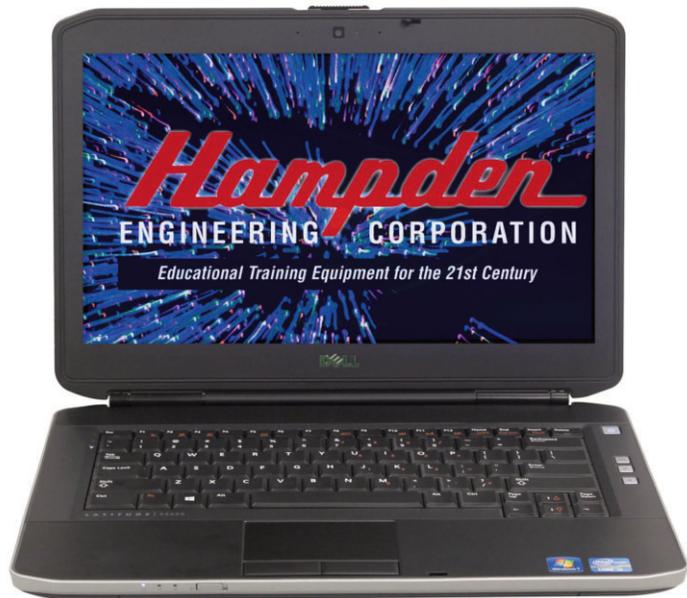

The Hampden **MODEL H-LTCS** is a fast, rugged, expandable, system that is built to stand-up to the heavy demands of an educational environment.

Plenty of expansion capacity in addition to the highest quality components have made the Hampden **H-LTCS** a performance leader.

We design, test and run all of our software products on this system and have found it to be one of the most dependable and stable platforms we have ever used. The **H-LTCS** easily delivers all the capabilities and speed needed to perform as a state-of-the-art learning base for our complete line of training equipment and tools.

### **Minimum Configuration:**
