April Events at Dominican Retreat and Conference Center

SAVE THE DATES!

BE GREEN!!! Whenever you wash just a few clothes or dishes at a time rather than waiting for a full load to accumulate, you're wasting water, power, and money. Most of the energy consumed by washers goes toward heating the water. Combining half-loads, choosing short cycles, and using cold or warm rather than hot water in the clothes washer racks up savings. Wash two fewer loads of clothes and one fewer load of dishes a week and save up to 4,500 gallons of water a year.
