THE 8 COMETS OF THE VIRGIN

The purpose of this illustration is to ascertain the frequency of how many comets have traversed through the constellation of *Virgo* in recent history. The various paths of the comets will be studied to see if there is any possible correlation to the leading-up to the *Great Sign* that occurs in *Virgo* the Fall of 2017. In previous studies of this Revelation 12 *Sign* phenomenon, there have been already 2 comets that are significantly attributed to be part of the prophetic 'picture' in terms of their place and time. The 1st comet was C/2017 E1 or Borisov that was shown to be the 'Conception Comet' that 'impregnated' *Virgo* as it were. It came from a straight shot in Leo after nearly 2000 years of 'coiled' retrogrades in *Cancer*. The 2nd comet of significance directly associated with the *Great Sign* alignment is Comet 67p. This specific comet is called the 'Jubilee Comet' as it was last seen in *Virgo* when Jerusalem was liberated from the Muslims in 1967. This same comet happens to conjoin with the Moon as the alignment is realized on the 23 of September in 2017.

There appears that 4 comets come into *Virgo* from the right side and 4 comets come from the left side. There is 1 comet, *Lovejoy 2011* that comes up the middle as it were the 'stem' of the 4 respective branches. The comets, all 8 of them would represent the 'Light of the World' that signals the coming birth of the *Light of the World*, Jesus. This 'Feast of Lights' is also directly associated with Jesus Christ, His dedication and ministry.

As the 'Light of the World' was and is one of the *I AM's* of Jesus Christ that He Himself attributed His purpose and being with, the following is suggested concerning His birth. Chanukah usually falls in the winter season of the year. If one takes the supposed birth day of Jesus to be -3 BC on September 11, then approximately 9 months prior would be in the month of December and the timeframe for when the Jews would celebrated Chanukah.

Many believe that this *Great Sign* of *Virgo* that appears to astronomically fulfill the depiction of the vision given by the resurrected Jesus Christ to His last Apostle, John is what was depicted in Revelation 12. Although the context is believed by many to be the mid-point of the chronological timeline of the last *Week of Years* per the prophet Daniel, it is a multilayered encryption of a past, present and future fulfillment. Although there are 1000s of comets in space, this study seeks to narrow down only 8 that have passed through the constellation of *Virgo* for the past 3 decades. What this study will also suggest that only these 8 have occurred in *Virgo* and have a possible prophetic implication as to suggest a 'Menorah' type of association.

More specifically, the type of 'Menorah' portrayed as each of the 8 comets could be attributed and correspond to a 'light'. Thus this would make the 'Menorah' typology one that is celebrated during Chanukah. The Chanukah Menorah has 8 stems instead of the 7 that was in the *Holies* of the *House of YHVH*. The *Feast of Dedication* as it was called in the New Testament attests to the significance and divinely sectioned observation of YHVH's Earthly People when they threw-off the yoke of the Grecian Empire for having desolated the Temple by the desolations of Antiochus Epiphanies. It is believed that only 1 days' supply of the *Holy Oil* that was used to light the Menorah lasted for 8 days. This occurrence was taken as a sign and has bene commemorated by the Jews ever sense. It is rather interesting that in no books of the *Torah* is Chanukah mentioned but only in the books of the Maccabees and more prominently in the *Gospels*.
