Occasionally, the teachers take images of the children as they participate in the program. These images are posted in Social Media (Facebook, Instagram, etc..), in the school's website with password protected (only parents have access to see the photographs), and in the day care center for children's learning purposes. They may be used on posters or charts, in scrapbooks and learning materials, or in cubbies and placemats as identification. (Image-taking refers to the taking of photographs, videotaping or any other electronic means of capturing children's images.)
