- Cloud Solutions

### THINK IT AI: Your Smart Technology Partner That Gets IT

With decades of experience helping government agencies choose, implement and manage technologies, Think IT Ai's solution architects understand the specialized IT needs and challenges of government technology.

#### Procurement

Think IT Ai holds a wide range of government contracts to help streamline procurement and get agencies the IT products and services they need quickly.

#### Cloud

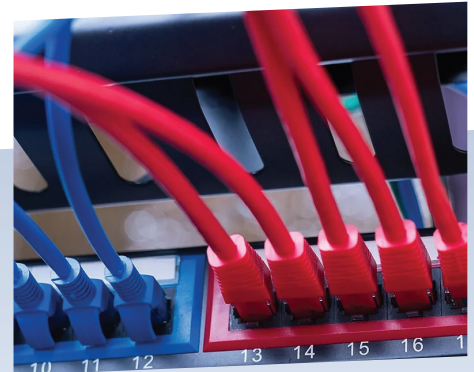

Think IT Ai's cloud experts can help agencies with cloud migration to both private and/or secure public cloud providers, including applications migration, multicloud strategies and more.

#### Mobility

Our relationships with leading device makers, app development firms and network infrastructure manufacturers make Think IT Ai an all-in-one mobility partner.

#### Configuration and Managed Services

Our configuration and managed services free up agency staff to do their jobs. Our field engineers have 20+ years of experience in enterprise network infrastructure
